An important milestone in the evolution of AutoCAD was its decision in 1991 to switch from a bitmapped graphics display to a “high performance vector graphics” display. History AutoCAD was developed by a small team at Autodesk, beginning as a DOS-based app in the 1980s. Autodesk acquired companies NAG and Hectec in January 1997. In April 1997, Autodesk also acquired Softimage, a company that specialized in 3D graphics. Autodesk announced AutoCAD LT as a Light Table Design application in August 1998. Autodesk acquired Graphisoft in 1999. In 2000, Autodesk sold Graphisoft to UGS Corporation for \$240 million. In November 2001, Autodesk acquired CADalyst, a provider of CAD data management software. In July 2004, Autodesk acquired Archistar, a company that provides CAD-based document assembly solutions. In May 2009, Autodesk acquired Solibri, a provider of CAD-based product development software. In September 2012, Autodesk acquired other CAD companies: DTMdata, Radiometer, National Instruments, and Certara. Nomenclature The company uses a variety of terms to describe its software. I'm using Guzzle and I've been trying to figure out the easiest way to have the response go straight to the client, without having it send the response to an intermediary cache. Here's my current code: `return $client->get("...")->getBody();` I was thinking something like this: `return $client->get("...")->getBody()->getStream();` but it just returns null. Any suggestions? A: You are almost there, but that function is expecting an array of request options, not an array of request parameters. You can also take advantage of the expectation that streams have a `send` method. The following should work: `return $client->get("...")->getBody()->send();` The prevalence of ADHD among adult high school students. To examine the prevalence of adult ADHD in high school students, school-based screening questionnaires were used to identify 275 students who participated in a neuropsychological examination of cognitive function. The school-based screening questionnaires included the Wender Utah Rating Scale (WURS-R), the 14-item Adult ADHD self-report scale (ASRS), and the 14-item ASRS used by Kowatch et al. with cutoffs of 14 and 20. Compared with a community sample, the high school students were more likely to have ADHD (adjusted odds ratio = 4.5).
