Quick Hide IP Platinum Crack X64 (Latest)

[Download](#)

Hide My IP Security is an advanced and professional-grade software solution that helps you surf the Internet anonymously. It offers the high level of safety you need when using your PC on public Wi-Fi networks and Web pages. It will make sure your sensitive information won't be stolen when you

access websites like banks or social networks. The Internet isn't a safe place any longer! Hackers are everywhere, and they can easily take over your computer and gain access to the most sensitive information stored on it. This software will help you find a new place to hide, because only with us you can be sure that your sensitive information won't be stolen.

HOW TO USE HIDEMYIP SECURITY VERSION 2.0

1. Double click on the download link from the bottom of this page. The program will install after the installation, this could take up to 1 minute depending on your system configuration 2. After the installation, a simple interface will be displayed allowing you to easily choose the proxy

server of your choice in a few mouse clicks. Only press the button 'Show Proxies' and you are ready to begin hiding your actual IP address. 3. Hide My IP will work in a stealth mode, this means that if you do not connect to any proxy server, you won't get an IP address. Just connect to the selected proxy server and hit 'Hide' to begin the process. 4. After

the process is finished, you will be able to re-connect to the proxy server and you'll get an IP address assigned to you. If you don't want to use a proxy server, just leave the field empty and click on 'Use My Local IP address' and you will get your actual IP address. 5. In both cases, your IP is going to be hidden during browsing 6. Now the most important thing, is to

select a proxy server that will provide you a good speed to avoid disconnections when browsing. Don't use the default options because they won't work! 7. Keep in mind that it is not uncommon to use a proxy server that, at first, connects you to an auction website, an on-line shopping portal, a news site, and other such websites

where you have to pass through a lengthy process before accessing your usual website. 8. When the process is finished, select another proxy and repeat the process.

Quick Hide IP Platinum Crack + For Windows [March-2022]

· Launch the program · Change the proxy settings · Start the browser · Auto hide your IP · Connect to the

server · View real IP · View real IPs · Change IP address · Clear proxy settings · Change proxy setting · Test IP with Google Map · Clean proxy list · Edit IP · Change proxy · Settings · Check IP · Clean proxy list · Auto Hide IP · Check IP · Edit proxy setting · Save proxy setting · Load proxy list · Reset IP/proxy settings · Restart IP/proxy · Hide IP · Toggle

CPU Usage (AKA Process / CPU Graph)Monitor your process CPU usage with a live graph. This software brings you a full process CPU graph of system processes. It will show you a graph of total percent process CPU usage over time or over the last 2 hours, including your CPU usage

per application. You can use this graph for system monitoring and finding which application is using all of your CPU.Quick Hide IP Platinum download size: 1.5 Mb Download Now Important Notice: Windows Only Quick Hide IP Platinum 1.5.2 License Key is a shareware and as such, you can only use it as long as you want to. In other words,

you don't own the software, it can be removed from your computer without any troubles or issues and it's not going to be the last time you use it. Easy Hide IP is a software that helps you find a proxy to change your IP. It is extremely easy to use and is based on a real and working Virtual Private Network (VPN) connection. It has been created with the

aim of helping people to use a private IP when they are surfing on the Internet, in order to avoid using public IP addresses and being noticed. The best thing about Easy Hide IP is that it allows you to use your own IP, not that from another country, for a proxy. Furthermore, the program allows you to hide your location, to change your IP, and also to restart

the proxy. In addition, it offers a convenient interface that has a few easy-to-use controls and features: • Specify your own IP address • Select among the available proxy servers • Test your connection • Resume the proxy connection automatically or manually • Hide your IP address (works with Windows 7, Windows 8, and Windows 10) •

Change your IP address •
Check your IP address •

What's New In Quick Hide IP Platinum?

Quick Hide IP Platinum is a lightweight software application that will help you surf on the Internet anonymously. The program is able to offer you protection against malicious applications that may steal important data from your computer by hiding your real IP address and assigning a new one. It sports a clean and intuitive interface that

allows you to configure the dedicated parameters without having to consult a help manual or watch online tutorials. The tool features a list with anonymous proxy servers that you can use for hiding your real location, and lets you test the connection speed. Plus, you are offered details about each proxy server, such as country, IP, type, uptime,

and speed. What's more, you can conceal or restore your IP address, enable the automatic IP hiding option, check an IP address using the Google Map service via your default web browser, as well as view your real and current IP addresses. Since there aren't many configuration settings, even rookies can master the process with minimum

effort. During our testing we have noticed that Quick Hide IP Platinum carries out a task quickly, and no errors showed up throughout the entire process. It is quite friendly with system resources, so the overall performance of the computer is not affected. All things considered, Quick Hide IP Platinum provides an intuitive layout and a

handy set of parameters for helping you hide your real IP address from websites that may track your location. It can be easily installed and configured by all types of users, regardless of their experience level. The software is priced at $49.95 and can be downloaded directly from the official site. Sharing resources Currently, there are 16

resources currently shared by 16 users. Sharing events There have been 13 events for 13 users. Sharing notes Currently, there are 3 notes shared by 3 users. Show More Notes [NOT ENOUGH DATA] Superfast Speed Test by SurfClub - Max Speed Test is a comprehensive feature-packed speed test and monitor website that lets you

test your Internet connection speed, as well as the speed of your Internet service provider at all times. It allows you to use real websites and online resources to perform the speed test, without having to stress about privacy issues. Plus, you can check the speed of your Internet service provider at any time of the day or night without

being concerned about fraudsters. The utility offers a convenient interface, and everything you need is on its main page: speed test results and other details
